

May 16, 2008, Virtual Office Patch to Correct Picture Download

Before beginning this process, make sure your virus software is turned off and Virtual Office is closed!

Go to <http://hillsoft.com> then click the Downloads icon shown below. The navigation bar is located at the top of the page.

From the Downloads window locate the Virtual Office 8.1 **Desktop** section then click the underlined link labeled "FULL INSTALL/UPGRADE". The section of the page is shown below.

Click the **Run and Install** button on the next screen, shown below.

HILLSIDE SOFTWARE

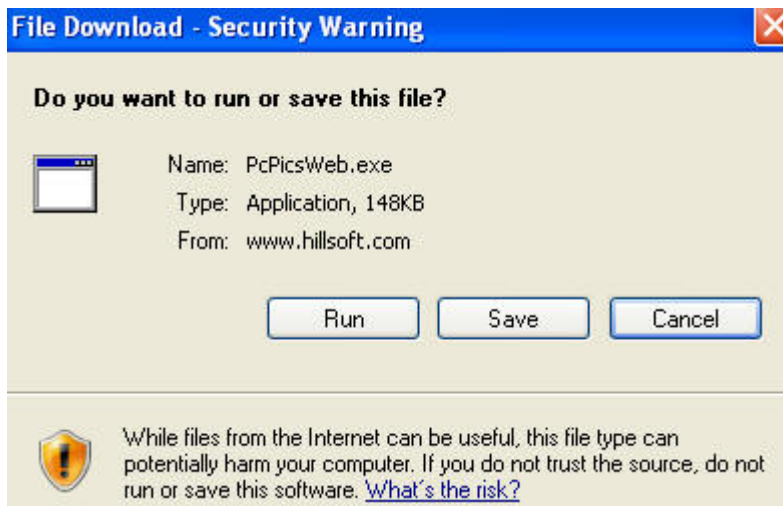

Virtual Office Desktop Version 8.0b March 19, 2008

Click the following button to Run and Install the latest Version.

Run and Install

INTERNET EXPLORER 6 & 7 INSTRUCTIONS

Click the **Run** button on the next popup window, shown below. (Your computer may say Open, depending on the operating system.) Do not click Save!

The files will be loaded. If you receive the security warning shown below, click **Run**.

The installation will be begin. It may take several minutes. Any screens that require a response, just click Next, Okay, or Finish to continue to the next step. When finished shutdown your computer then restart it. Open Virtual Office and you are ready to download data and pictures.
